guide to foreign trade statistics: 1968

The foreign trade statistics program is under the direction of Dino S. Villa, Chief, Foreign Trade Division. Technical staff and the areas of their responsibility are indicated below:

Regulations and Economic Statistics
Irving Weiss, Assistant Division Chief

Trade Practices and Regulations Branch
Clifton S. Jordan, Chief

Commodity Programs
Joseph H. Freeman, Assistant Division Chief

Classification Systems Branch
Shirley S. Dungee, Chief

Food, Animal, and Wood Products Branch
John R. Anglin, Chief

Textiles Branch
Clarence Hutchinson, Chief

Minerals and Metals Branch
Harold L. Blyweiss, Chief

Machinery and Vehicles Branch
Jeanne M. Boocks, Chief

Chemicals and Sundries Branch
James A. Dailey, Chief

Program Implementation and Transportation Advisor
Milton Kaufman, Acting Assistant Division Chief

Special Reports and Foreign Aid Branch
Charles C. Alexander, Chief

Trade Information Branch
Lala B. Pipkin, Chief

Program Plans and Specifications Branch
Sadie B. Bayne, Chief

Program Research and Systems
Leonard R. Jackson, Assistant Division Chief

Systems Branch
Martin M. Weingarten, Chief

GUIDE TO FOREIGN TRADE STATISTICS: 1968

Chapter I - Introduction

The foreign trade statistics program, conducted by the Bureau of the Census, involves the compilation and dissemination of a large body of data relating to the imports and exports of the United States. These statistics are designed to serve the needs of both Government and non-Government users who have a wide range of interests. The program, therefore, includes a variety of data presented in many different arrangements and released in the form of reports which are available by subscription and in reports and machine tabulations which are distributed to Department of Commerce field offices and Bureau of Customs offices for public reference use. This brochure is intended to serve as a guide to the various sources of foreign trade statistics and to inform users of the content and general arrangement of the data. It should, therefore, assist in

the location of particular information and make it possible to utilize the available sources to better advantage.

Some changes have been made in the foreign trade statistical program since the release of the previous Guide for 1967. The material in this 1968 issue has been brought up-to-date to reflect such changes. The reports and tabulations listed herein represent current plans for the release of foreign trade statistical data during 1968. In view of the dynamic nature of the foreign trade statistics program and the desire to keep this program responsive to the varying needs of users, it is always possible that additional changes in the program may be required. As in the past, any changes of a substantial nature affecting the coverage or presentation of the statistics will be announced in the appropriate publications.

Chapter II - Description of the Foreign Trade Statistics Program

IMPORT STATISTICS

Types of Shipments Included and Excluded

The import statistics reflect imports of merchandise into the U.S. customs area from foreign countries. The U.S. customs area includes the 50 States, the District of Columbia, and Puerto Rico. Imports into the Virgin Islands (not a part of the U.S. customs area) are not included in the U.S. import statistics, but imports into Puerto Rico from foreign countries are included. Shipments between the United States and its outlying possessions (including the Virgin Islands), between the United States and Puerto Rico, and shipments between any of these outlying areas, are not included in the U.S. import statistics. (See the section on trade with outlying areas of the United States.) The statistics include both Government and non-Government imports, without regard to whether or not the importation involves a commercial transaction. However, American goods returned to the United States by U.S. Armed Forces for their own use are not included. Merchandise shipped under customs custody through the United States in transit from one foreign country to another is not reported as imports. In general, the import statistics are a complete record of the physical movement of merchandise into the United States from foreign countries (except for in-transit shipments), but there are some exclusions of items of relatively small importance in terms of total value, such as personal and household effects.

Types of Imports

Imported merchandise is reported as "general imports" and "imports for consumption."

General imports are the total of the entries for immediate consumption and entries into warehouses and therefore reflect the total arrivals of merchandise, whether such merchandise enters consumption channels immediately or is entered into warehouses under customs custody to be subsequently withdrawn for consumption or withdrawn for exportation.

Imports for consumption are the total of the entries for immediate consumption and the withdrawals from warehouses for consumption and, therefore, reflect the

total of commodities entered into U.S. consumption channels.

For statistical purposes, imports are classified by the type of transaction, for which "Types of Imports" codes are shown in some of the import reports or machine tabulations. General imports are a combination of types 1, 3, 5, and 6, as indicated below, while imports for consumption are a combination of types 1, 2, 5, and 6.

Type 1 merchandise entered for immediate consumption;¹

Type 2 merchandise withdrawn from bonded storage warehouses for consumption,¹ withdrawn from bonded smelting and refining warehouses for consumption or for export, and transferred from bonded storage warehouses to bonded manufacturing warehouses for manufacturing and export;

Type 3 merchandise entered into bonded storage warehouses, and entered into bonded smelting and refining warehouses;

Type 4 merchandise withdrawn from bonded storage warehouses for exportation (compilation of statistics discontinued effective March 1958);

¹The terms "entered for immediate consumption" and "withdrawn from warehouse for consumption" are taken from the language used in handling the transactions through customs and are sometimes misleading in their implication that the merchandise is immediately assimilated by being processed, merchandised, or consumed. Although all customs barriers to such assimilation have been removed, merchandise for "immediate consumption" may, in fact, be warehoused by the importer outside of customs custody. In the case of withdrawals for "consumption," although duties have been paid and the goods released from customs control, they may remain in storage for a further period of time. Any of this "for consumption" merchandise, of course, could conceivably be exported subsequently to its release from customs custody, and thus never enter actual U.S. consumption channels. For these reasons the term "imports for consumption" is somewhat inappropriate to describe the statistical series. Many countries use the term "special imports" to designate statistics compiled on this basis.

- Type 5 merchandise entered into bonded manufacturing warehouses for processing and subsequent export of the main product; and
- Type 6 merchandise entered into bonded storage warehouses in foreign trade zones as "privileged" merchandise.²

Monthly Coverage

It is the objective of the compiling procedures, insofar as practical, to include shipments in the import statistics for the month of import which, in general, is based on the date of filing of the import entry (immediate consumption or warehouse entry) or warehouse withdrawal document.³ However, because of processing problems, there has always been a carryover of a small percentage of items from the proper month to a subsequent month (usually the month immediately following).

In general, except for the month when a change in the carryover is introduced, the carryover should have little effect on month-to-month comparisons of overall import totals since the carryover of the previous month should compensate roughly for that of the following month. For smaller segments--commodity, country, and commodity by country totals--there is also some compensation on a month-to-month basis, but comparisons should be made in awareness of the possibility that the figures for a given month may represent more or less than the amounts shipped during the month, especially where the volume of trade is not large.

Source of Information

The source of information on imports of merchandise is the import entry and warehouse withdrawal forms which importers are required to file with customs officials. Statistical factors of country of origin, net quantity, value, and commodity classification are verified by customs officials on formal consumption and warehouse entries filed for transactions valued over \$250 which are ordinarily subject to examination for customs appraisal purposes. The statistical copy of the entry is corrected if it does not accurately reflect the information called for by the statistical requirements. Information on warehouse withdrawals which account for approximately 6-percent of the total value of imports for consumption, while not subject to the verification procedure directly, should be improved indirectly (due to education of importers/brokers) by the verification of the warehouse entries to which they correspond.

²"Privileged status" for foreign merchandise in a foreign trade zone means that a warehouse entry is filed for the merchandise and the tariff classification for duty purposes and the amount of duty are determined on the basis of the classification of the merchandise and the duties applicable when the warehouse entry is filed. This classification and amount of duty apply to the merchandise if it is brought into the customs area at a later date, even though the rate of duty or the merchandise itself may have been changed in the meantime. Ordinarily an import entry is not filed when foreign merchandise enters a foreign trade zone, but is filed when the merchandise leaves the foreign trade zone and enters U.S. customs territory.

³For shipments by vessel, merchandise is not included in the statistics prior to the date of formal entrance of the vessel (i.e., the date of the inward customs manifest for the vessel).

Valuation

The dollar value shown in the import statistics is defined generally as the market value in the foreign country, and therefore excludes U.S. import duties, freight charges from the foreign country to the United States, and insurance. Value information is required to be reported on import entries in accordance with Sections 402 and 402a of the Tariff Act of 1930, as amended.

The definition given above is a very general interpretation of the bases for reporting import values. More specifically, with certain exceptions as indicated in the next paragraph, imports are reported in accordance with the provisions of Section 402, in terms of (1) the export value, or (2) the U.S. value, if the export value cannot be determined satisfactorily, or (3) if neither of these values can be determined satisfactorily, then the constructed value is reported.

Effective February 27, 1958, certain articles specified by the Secretary of the Treasury (Treasury Decision 54521) as well as all merchandise imported prior to that date, are reported in accordance with the provisions of Section 402a, in terms of (1) the foreign value or the export value, whichever is higher; (2) if these values cannot be satisfactorily ascertained, then the U.S. value is used; (3) if none of the preceding values can be satisfactorily ascertained, then the cost of production is used. However, for some articles (certain coal tar products, canned clams, and certain knit wool gloves), the value reported in the import statistics is the American selling price. For definitions of each of these bases of valuation, reference should be made to Sections 402 and 402a of the Tariff Act of 1930, as amended.

The data for "Dutiable value", shown in some reports, represent the value of the foreign components contained in products imported into the United States for immediate consumption. The data for "Calculated duty" represent the estimated import duties and taxes on imports for consumption collected under rates established by the Tariff Act of 1930 as amended by the Tariff Classification Act of 1962, the Internal Revenue Code, Public Laws, and Presidential Proclamations. The data on calculated duty have not been verified. Therefore, these data should be used with caution and only after verification of the data shown by actual calculation (under the applicable rate or rates of duty for commodity classifications as shown in Tariff Schedules of the United States Annotated).

Commodity Information

The basic import data are initially compiled in terms of the commodity classifications in Tariff Schedules of the United States Annotated (TSUSA). In reports such as FT 135 and IM 150/155, the TSUSA data are presented in terms of a rearranged commodity classification system--Schedule A, Statistical Classification of Commodities Imported Into the United States, which is based on the Standard International Trade Classification, Revised (SITC).⁴ Schedule A was constructed by the Bureau of the Census in order to provide for the sum-

⁴United Nations Statistical Papers, Series M, No. 34, 1961.

marization of data for the approximately 10,000 TSUSA classifications into about 2,300 commodity groupings which are meaningful in terms of commodities important in the U.S. import trade and, at the same time, to provide data in terms of the Standard International Trade Classification outline which are comparable, insofar as possible, to the foreign trade statistics compiled by other trading nations.

The foreign trade statistics program includes monthly and annual import data in terms of both Schedule A and TSUSA classifications. In addition, annual data in terms of classifications based on the Standard Industrial Classification (SIC) are also released. This rearrangement of the import data into a structure related to the origin of production is issued as soon as possible after the compilation of the original annual import data. Information regarding the SIC-based import product classifications is contained in Report FT 210 which presents import data in SIC-based product classification by area of origin arrangement. Additional data in terms of the SIC-based classifications are contained in tabulations IA 275 and IA 276.

Information on imports of commodities classified on the basis of "end use" is contained in machine tabulation IM 171. These data are available for reference use at principal locations.

Additional information regarding commodity classifications is contained in a comprehensive publication entitled U.S. Foreign Trade Statistics Classifications and Cross-Classifications, first published in September 1967. This publication brings together all the schedules of commodity and geographic trade classifications and cross-classifications currently being used in the compilation and publication of U.S. import and export statistics. Included, for example, are tables showing the TSUSA import classifications and their correlation to the categories comprising end-use and SIC-based product classifications, and the cross-classification between Schedule A and TSUSA classifications. This publication also includes other classification schedules, as indicated elsewhere in pertinent sections of this explanation. Copies of this publication are available for reference use at Department of Commerce field offices. Copies may also be obtained from the Bureau of the Census at a cost of \$6.00 per copy.

Country and Area of Origin

The country reported in the statistics as the country of origin is defined as the country where the merchandise was grown, mined, or manufactured. In instances where it is known that the country of origin cannot be determined, the transactions are credited to the country of shipment.

In foreign trade reports and tabulations, countries are presented by name and/or code as shown in Schedule C, Classification of Country Designations Used in Compiling the U.S. Foreign Trade Statistics. (In some import reports, the country name or code is followed by the code 0 (or blank) to indicate country of origin, or the code 1 to indicate country of shipment.) Country names which are abbreviated in reports and tabulations to save space are shown in full in Schedule C, together with descriptions of the countries, adjacent provinces, territories, islands, or other areas considered to be a part of the country for statistical purposes. Schedule C is

published as Annex B in Tariff Schedules of the United States Annotated and is included in the publication U.S. Foreign Trade Statistics Classifications and Cross-Classifications. A separate edition of Schedule C is also available free upon request to the Bureau of the Census.

The major world areas for which foreign trade data are shown represent groupings of individual Schedule C countries with the exceptions of Canada, the United Kingdom, and Japan which are treated as separate areas. A list showing the major world areas and the individual countries included in each area appears in the above-mentioned publication containing classifications and cross-classifications. The country designations UNIDENT and Unidentified Countries are used to reflect imports from countries which could not be identified because of illegible reporting on import entries for low-valued shipments.

Customs District for Imports

For imports by all methods of transportation combined, merchandise is shown as imported into the customs district of entry, i.e., the district in which the merchandise is cleared through customs for entry into consumption channels or entered into customs warehouses. In either case, this may not be the district at which the merchandise arrived in the United States nor its final place of destination. When separate data are shown for imports by vessel and air, the customs district shown is the district of unloading, which may not be the same as the district of entry. Imports by mail are credited to the district in which the import entry is filed. Imports credited to interior districts represent imports by air or imports leaving customs custody in such districts after having been transported in customs bond from a border point or seaport.

The names and codes of the customs districts and ports are listed in Schedule D, Code Classification of United States Customs Districts and Ports Used in Compiling the U.S. Foreign Trade Statistics. Imports of vessels moving under their own power or afloat are included under a single code (District 60) and are not reported by individual customs district of entry. Also, estimates for shipments valued \$250 and under are reported under a single code (District 70). Schedule D is published as Statistical Annex A in TSUSA and is included in the publication U.S. Foreign Trade Statistics Classifications and Cross-Classifications. Copies of Schedule D may also be obtained free of charge from the Bureau of the Census.

Estimated Data for Low-Valued Imports

Data on imports valued \$250 and under reported on both formal and informal entries (informal entries generally contain items valued not more than \$250) are estimated from a 1-percent sample. The estimates for shipments valued \$250 and under are (1) shown under Schedule A numbers 990.0000, 990.0, 990, and 99 and included in the Section 9 total; and (2) shown under TSUSA numbers 999.9500 and 999.9 and included with other items in the totals for codes 999 and 99, and the Schedule 9 total. These estimates are excluded from the other commodity codes. However, these estimates for low-valued shipments are included in the country and

area totals and the total for U.S. imports. (The estimates for low-valued shipments do not reflect any imports by mail of duty-free merchandise valued under \$251, for which import entries are not required to be filed.)

The statistics for commodity codes from which the low-valued shipments are excluded are undercounted to the extent that such low-valued shipments of the particular commodity are made. The total value so excluded generally amounts to about 1 percent of the monthly import total. Although subject to considerable variability,⁵ particularly where the estimated amounts are relatively small, these estimates for low-valued imports may be of some interest as a rough guide to the general magnitude of the effect which the exclusion of the items has on the commodity data for individual areas or countries. An indication of the sampling variability of the estimates may be obtained by using the number in sample in conjunction with the variability table which appears in the General Explanation of Report FT 135.

Unit Control

For some TSUSA commodity numbers, net quantity information is required to be reported in two units, as specified in Tariff Schedules of the United States Annotated. However, value information for the commodity is reported with only one of the units. In machine tabulations containing TSUSA commodity information, the unit control code zero is used (or column may be blank) for the unit with which value is reported. Unit control code 2 is used for the unit with which value information is not reported.

Economic Class and Economic Class Aggregate Codes

Following is a list of the economic class and economic class aggregate codes used in the reports and tabulations containing such data.

Economic class codes:

- 0--agricultural crude materials
- 1--nonagricultural crude materials
- 2--agricultural crude foodstuffs
- 3--nonagricultural crude foodstuffs
- 4--agricultural manufactured foodstuffs and beverages
- 5--nonagricultural manufactured foodstuffs and beverages
- 6--agricultural semimanufactures

⁵The estimated total for low-valued imports reported under Schedule A commodity number 9900000 or TSUSA number 9999500 is subject to a sampling variability of 4 to 5 percent. This means that the chances are 2 out of 3 that a complete tabulation would have resulted in a figure that differed from the estimate by no more than 4 to 5 percent. The estimates by country under Schedule A commodity number 9900000 or TSUSA number 9999500 are subject to greater sampling variability--around 13 percent for countries with about 275 low-valued shipments in the sample; around 25 percent for countries with about 100 shipments in the sample and over 25 percent for smaller sample sizes.

7--nonagricultural semimanufactures

8--agricultural finished manufactures

9--nonagricultural finished manufactures

Economic class aggregate codes (totals for the economic class codes given above):

- 1--crude materials (economic class codes 0 and 1)
- 2--crude foodstuffs (economic class codes 2 and 3)
- 3--manufactured foodstuffs and beverages (economic class codes 4 and 5)
- 4--semimanufactures (economic class codes 6 and 7)
- 5--finished manufactures (economic class codes 8 and 9)

TYPES OF DUTY (RATE PROVISION) CODES

The following codes, which appear in many of the import tabulations, indicate the free or dutiable status of merchandise imported into the United States:

Free Items⁶

- 10--Free under specific provisions for free status in TSUSA Schedules 1 to 7, inclusive, except "Products of Cuba"; or free under certain special classification provisions in Schedule 8 except those referred to, by item number, elsewhere in this list of rate provision codes.
- 11--Free as "Philippine articles" (see General Headnote 3(c) of TSUSA). Includes articles free under specific provisions for Philippine and Trust Territory articles in Part 1, Temporary Legislation, of the Appendix to the Tariff Schedules in TSUSA.
- 12--Free under specific provisions for free status for "Products of Cuba" (see General Headnote 3(b) of TSUSA).
- 13--Free as articles to be processed under bond for exportation, including processes which result in articles manufactured or produced in the United States (see item 864.05 of TSUSA); or free for manufacture in bonded warehouse and export (Sec. 311, Tariff Act of 1930 and Sec. 312 as amended by Sec. 301(b) of the Tariff Classification Act of 1962).
- 14--Free as supplies for certain vessels and aircraft (Sec. 309, Tariff Act of 1930 and Sec. 10.59, Customs Regulations 1943). Includes equipment and repairs to vessels if duty remitted.
- 15--Free as articles for foreign governments granted free entry on a reciprocal basis, or as articles for public international organizations (Schedule 8, Part 3, Subpart B, Headnote 2 of TSUSA). (See items 841.10 and 841.20 of TSUSA.)

⁶Philippine articles dutiable at the lowest prevailing rates or at fractional parts of the most favorable rate set forth in column numbered 1 of the TSUSA Schedules are shown in certain machine tabulations with 3-digit rate provision codes ending in "8." The first two digits of these codes are the regular rate provisions shown above and identify the lowest prevailing rate of duty, e.g., 128, 218, 418, etc. (See General Headnote 3(c) of TSUSA.)

16--Free as articles of the United States government which otherwise would be dutiable under specific provisions in TSUSA Schedules 1 to 7, inclusive, were it not for the following provisions for free entry in TSUSA Schedule 8, Part 3, Subpart A:

Articles for military departments (TSUSA item 832.00)

Articles for General Services Administration (TSUSA item 833.00)

Articles for the Atomic Energy Commission (TSUSA item 834.00)

Articles for the Commodity Credit Corporation (TSUSA item 836.00)

18--Free under specific provisions established by temporary legislation, Presidential proclamation, or administrative action, except such specific temporary provisions for Philippine or Trust Territory articles covered by rate provision code 11. (See Part 1 of the Appendix to the Tariff Schedules in TSUSA.)

19--Free for export of supplies from bonded warehouse to the armed forces of the United States and to United States agencies and establishments abroad.

Dutiable Items⁶

Dutiable at rates prescribed in column numbered 1 of TSUSA Schedules 1 to 7, inclusive (including column 1 minimum rates prescribed in headnotes to those schedules but not including those rates prescribed for "Products of Cuba" in the Schedules).

- | | |
|----------------------|--------------------|
| 21. Specific rates | 41. Compound rates |
| 31. Ad valorem rates | 51. Minimum rates |

Dutiable at rates prescribed in column numbered 2 of TSUSA Schedules 1 to 7, inclusive (including column 2 minimum rates prescribed in headnotes to those Schedules).

- | | |
|----------------------|--------------------|
| 22. Specific rates | 42. Compound rates |
| 32. Ad valorem rates | 52. Minimum rates |

Dutiable at rates prescribed in column numbered 1 of the Appendix to the Tariff Schedules in TSUSA (except those for "Products of Cuba") when such rates differ from those prescribed for the specified item number in TSUSA Schedules 1 to 7, inclusive.

- | | |
|----------------------|--------------------|
| 23. Specific rates | 43. Compound rates |
| 33. Ad valorem rates | |

Dutiable at rates prescribed in column numbered 2 of the Appendix to the Tariff Schedules in TSUSA when such rates differ from those prescribed for the specified item number in TSUSA Schedules 1 to 7, inclusive.

- | | |
|----------------------|--------------------|
| 24. Specific rates | 44. Compound rates |
| 34. Ad valorem rates | |

Dutiable at rates, becoming effective after the effective date of the Tariff Classification Act of 1962, as a result of concessions granted in the most recent trade agreement. (Applicable only during the calendar year in which

the new trade agreement rate initially is put into effect. Effective with statistics for January of the succeeding year, "1" is used as the last digit of the rate provision codes.)

- | | |
|----------------------|--------------------|
| 25. Specific rates | 45. Compound rates |
| 35. Ad valorem rates | |

Composite rates (average rates) for articles subject to various rates based on component parts.

- | | |
|----------------------|--------------------|
| 26. Specific rates | 46. Compound rates |
| 36. Ad valorem rates | |

Dutiable at rates based on those prescribed for "Products of Cuba" in any of the TSUSA Schedules or the Appendix thereto, or dutiable at fractional parts of such rates.

- | | |
|----------------------|--------------------|
| 28. Specific rates | 48. Compound rates |
| 38. Ad valorem rates | |

Dutiable at various rates or at special rates.

70.

EXPORT STATISTICS

Types of Shipments

With the exceptions described below, U.S. export statistics record the physical movement of merchandise out of the U.S. customs area to foreign countries, without regard to the method of financing, and without regard to whether or not the exportation takes place in connection with a commercial transaction.⁷ The U.S. customs area includes the 50 States, the District of Columbia, and Puerto Rico. Exports from Puerto Rico to foreign countries are therefore included in the statistics. However, the statistics do not include shipments between the United States and Puerto Rico, between the United States and its outlying possessions (including the Virgin Islands), or between any of these outlying areas. (See the section on trade of outlying areas of the United States.)

The following types of shipments from the U.S. customs area to foreign countries are excluded from the statistics:

1. Shipments to U.S. Armed Forces for their own use, including shipments to U.S. armed services post exchanges, etc., and a few other types of shipments for U.S. Government use which, though not consigned to our armed forces, are similarly identified with activities carried on for the direct benefit of the U.S. Government. For example, the following are excluded:
 - a. Shipments of office furniture, equipment, and supplies for the use of U.S. Government offices.
 - b. Shipments of food, medicines and related items, and other commissary supplies to U.S. Government offices or employees for their own use.

⁷Since it is the movement of merchandise out of the United States which is being measured, the statistics do not, of course, include U.S.-owned or/-financed goods moving directly from one foreign country to another.

- c. Shipments for the construction and maintenance of U.S. satellite tracking stations in foreign countries.
 - d. Shipments to the Canal Zone for the exclusive use of the Panama Canal Zone government or the Panama Canal Company and shipments of supplies and material to contractors in the Panama Canal Zone for the construction and/or maintenance of the Panama Canal Zone and its facilities.
 - e. Shipments in connection with the U.S. Antarctic Research Program.
2. Merchandise shipped in transit through the United States from one foreign country to another, when documented as such through U.S. customs. (Foreign merchandise which has entered the United States as an import and is subsequently reexported is not treated as in-transit merchandise, and is shown separately as "Exports of Foreign Merchandise.")
 3. Bunker fuel and other supplies and equipment for vessels and planes engaged in foreign trade. (Information on bunker fuel is published in Report FT 810. See the section on Summary Reports in chapter III.)
 4. Gold and silver in the form of ore, sweepings, scrap, bullion, or coins. (Information on exports and imports of gold and silver is published in Report FT 2402. See the section on Summary Reports in chapter III.)
 5. Electrical energy.
 6. Some types of shipments of relatively small significance, such as low-valued or noncommercial exports by mail, temporary exports and the return of temporary imports, household and personal effects of travelers, goods for the personal use of U.S. Government employees abroad, etc.

Monthly Coverage

In general, compiling procedures provide for the inclusion of shipments in the statistics for the month of export.⁸ However, because of processing problems, there has always been a carryover of a few percent of shipments from their proper month to a subsequent month, usually the following month. The carryover should have little effect on month-to-month comparisons of overall export totals since the carryover of the previous month should compensate roughly for that of the following month.

For smaller segments--commodity, country, and commodity by country totals--there is also some compensation on a month-to-month basis, but comparisons should be made in awareness of the possibility that the figures for

a given month may represent significantly more or less than the amounts shipped during the month, especially where the volume of trade is not large.

Definition of Exports of Domestic and Foreign Merchandise

Exports of domestic merchandise include commodities which are the growth, produce or manufacture of the United States, and commodities of foreign origin which have been changed in the United States from the form in which they were imported, or which have been enhanced in value by further manufacture in the United States. Sugar refined in this country from imported raw sugar, flour ground from imported wheat, and ores or metal smelted or refined from imported ores or metal are examples of commodities considered to be domestic for statistical purposes when exported to a foreign country. Also when material or parts of foreign origin are imported into the United States and incorporated with material or parts produced in the United States, the complete product is considered to be a domestic product and the imported parts lose their identity as foreign merchandise. Exports of foreign merchandise include commodities of foreign origin which have entered the United States as imports and which, at the time of exportation, are in substantially the same condition as when imported.

Source of Information

The source of information on export shipments (except for Department of Defense Military Assistance Program Grant-Aid shipments which are reported directly to the Bureau of the Census by the Department of Defense) is the Shipper's Export Declaration, Commerce Form 7525-V, which exporters are required to file with customs officials.

Valuation

The valuation definition used in the export statistics is the value at the seaport (any port which is accessible to seagoing vessels), border point, or airport of exportation. It is based on the selling price (or cost if not sold) and includes inland freight, insurance, and other charges to the port of exportation. However, it is sometimes difficult for an exporter to assign a valuation in accordance with this definition. For example, on a rail or truck shipment from an interior U.S. point to an interior point in Canada the amount of freight to be included in the export valuation to provide a value figure at point of export must frequently be estimated. In some cases the freight charges from the interior point to either the border point or seaport may be omitted completely, particularly those for which the Shipper's Export Declarations are prepared by the broker or where the usual export price quotation is f.o.b. an interior U.S. point. In other cases the export value is difficult to determine or must be estimated as in the case of export shipments from a business concern to its own subsidiary abroad. In other cases the value figure shown on the declaration may include ocean freight or insurance charges which should not be included under the definition.

Commodity Information

Export commodity information is compiled in accordance with the classifications established in the January 1965 edition of Schedule B, Statistical Classification of

⁸With minor exceptions, the date of export for shipments other than by mail is considered to be the date when the shipment leaves the United States, or, in the case of vessel or air shipments, the date when the carrier on which it leaves the United States departs (or is cleared from) the port at which the merchandise was laden on such carrier. For mail shipments, the date of export is considered to be the date of mailing.

Domestic and Foreign Commodities Exported From the United States. The 1965 edition of Schedule B which was based on the Standard International Trade Classification Revised,⁹ was developed with the primary objective of instituting a classification system providing for those detailed classifications or building blocks which would permit comparison of the U.S. export statistics with the foreign trade statistics of other countries as well as with data on domestic production.

Some of the Schedule B commodity descriptions used in foreign trade reports and tabulations are necessarily abbreviated to save printing costs or because of limited space and therefore, in many cases, they do not contain all of the qualifying information necessary to define completely the commodity for which statistics are shown. For complete definition of the individual Schedule B commodity classifications, reference should be made to the 1965 edition of Schedule B.

For exports by all methods of transportation combined, information on individual export shipments valued under \$100 is reported under Schedule B number 931.0040 without classification by commodity. Value information for such shipments is estimated each month on the basis of constant percentages of the individual country totals. The statistics for commodity classifications other than Schedule B number 931.0040 are undercounted to the extent that under \$100 shipments of the commodity are made. This is believed to have only negligible effect on the statistics for most commodities.

In addition to monthly and annual export data for Schedule B classifications, annual data in terms of classifications based on the Standard Industrial Classification (SIC) are also released. This rearrangement of the export data into a structure related to the origin of production is issued each year as soon as possible after the compilation of the original annual export data. Information regarding the SIC-based export product classifications is contained in Report FT 610 which contains export data in SIC-based product classification by area of destination arrangement. Additional data in terms of the SIC-based classifications are contained in tabulations EA 675 and EA 676.

Information on exports of commodities classified on the basis of "end-use" is contained in machine tabulation EM 571. These data are available for reference use at principal locations.

The comprehensive publication entitled U.S. Foreign Trade Statistics Classifications and Cross Classifications (first published in September 1967) brings together all the schedules of commodity and geographic trade classifications and cross-classifications currently being used in the compilation and publication of U.S. export and import statistics. For example, Schedule B classifications and their respective correlations to the categories comprising end-use and SIC-based product classifications, as well as similar classifications and cross-classifications relating to the import statistics, are included. Copies are available for public reference at Department of Commerce field offices. They may also be obtained from the Bureau of the Census at a cost of \$6.00 per copy.

⁹United Nations Statistical Papers, Series M, No. 34, 1961.

Country and Area of Destination

The country of destination is defined as the country of ultimate destination or the country where the goods are to be consumed, or further processed or manufactured. However, the statistics do not always reflect this definition since, at the time of exportation, the shipper may not know the ultimate destination of the shipment. In such cases, the shipments are credited to the last country to which the exporter knows that the merchandise will be shipped in the same form as when exported. It follows, therefore, that the statistics will tend to be overcounted for shipments to transshipment countries such as Hong Kong, Belgium, Netherlands, etc., and undercounted for other countries.

Countries are presented by name and/or code as shown in Schedule C, Classification of Country Designations Used in Compiling the U.S. Foreign Trade Statistics. Country names which are abbreviated in reports and tabulations to save space are shown in full in Schedule C, together with descriptions of the countries, adjacent provinces, territories, islands, or other areas considered to be a part of the country for statistical purposes. Schedule C is published as a part of Schedule B and is included in the publication U.S. Foreign Trade Statistics Classifications and Cross-Classifications. A separate edition of Schedule C is also available free upon request to the Bureau of the Census.

The major world areas for which foreign trade data are shown represent groupings of individual Schedule C countries with the exceptions of Canada, the United Kingdom, and Japan which are treated as separate areas. A list showing the major world areas and the individual countries included in each area is included in the above-mentioned publication containing classifications and cross-classifications.

Customs District for Exports

With the exceptions mentioned below, export shipments are credited statistically to the customs district through which the shipment clears when it leaves the United States. Therefore, the customs district shown in the statistics is not necessarily the district in which the merchandise was grown, manufactured, or otherwise originated.

Exports are credited to customs districts as follows:

1. For exports by vessel or air, the shipments are credited to the customs district in which the merchandise is loaded on the vessel or aircraft which takes the merchandise out of the country.
2. For exports by rail, truck, or pipeline, the shipments are credited to the customs district through which the merchandise crosses the U.S. border into foreign territory.
3. Aircraft exported under their own power are credited to the customs district from which they are flown out of the United States.

The names and codes of the customs districts and ports are listed in Schedule D, Code Classification of United States Customs Districts and Ports Used in Compiling the U.S. Foreign Trade Statistics. All mail

shipments are credited to one special district (District 80) and are not reported according to the geographical location of the post office from which the merchandise was mailed nor the customs district from which the mail leaves the United States. Likewise, vessels moving under their own power or afloat are reported under District 60 and shipments individually valued under \$100 are reported under District 70. Schedule D is published as a part of Schedule B and is included in the publication containing classifications and cross-classifications, mentioned above. Copies of Schedule D may also be obtained from the Bureau of the Census.

Security Restrictions

For certain commodities, referred to as Special Category commodities, security restrictions prevent the release of export information in as much detail as is released for other commodities. (Copies of a list of the Special Category commodities, which was published in the January 1965 issue of Report FT 410, may be obtained from the Bureau of the Census.) For each 7-digit Schedule B number which is classified as a Special Category commodity, data showing total U.S. exports of the commodity to all countries combined are released, without area, continent, country of destination, customs district of exportation, or other detail shown for the commodity. Exports of Special Category commodities are included in total export figures, and in Schedule B section, division, group, and subgroup commodity totals, without area, continent, country, or other detail shown for the Special Category commodities. Special Category shipments are also included in area and continent totals, and in the totals for individual countries except a few for which security regulations still restrict the release of Special Category information. However, Special Category shipments are not included in individual customs region or district totals. In reports showing data by method of transportation, the detailed vessel and air statistics (such as those shown in commodity, area, continent, or country arrangement) also exclude Special Category shipments.

Sampling of Low-Valued Export Shipments

The export statistics reflect fully compiled data for shipments to Canada individually valued \$2,000 and over and shipments to countries other than Canada individually valued \$500 and over. Data for shipments to Canada individually valued \$100-\$1,999 are estimated from a random 10-percent sample of such shipments while shipments to other countries individually valued \$100-\$499 are estimated from a random 50-percent sample. During the process of tabulating the statistics, the fully compiled and estimated data are combined. Additional details regarding the sampling procedure are contained in Report FT 410.

Since statistics based on a sample are not expected to agree exactly with the results that would be obtained from a complete tabulation, the export totals are subject to some degree of sampling variability. In general, the higher export figures will have smaller sampling variability in percentage terms. Low value figures are likely to have a high variability in percentage terms, although small in terms of the value of the trade. The sampling explanation in the detailed export reports contains further information regarding sampling variability in the export figures.

In view of the relatively low level of sampling variability involved in most of the totals, most users will not need to know the extent to which given figures are based on estimated data. Therefore, information as to the number of shipments in the sample is not included in published reports (except for Canada data). However, this information is contained in machine tabulations or it may be obtained from the Bureau of the Census, possibly with a charge for the work involved. This information may be used to obtain a rough indication of the estimated value of the low-valued shipments included in the total.

STATISTICS ON TRADE BY METHOD OF TRANSPORTATION

Many of the current foreign trade reports and tabulations contain data on imports or exports by all methods of transportation combined, with separate data for vessel and air shipments, the methods of transportation by which the bulk of foreign trade shipments are imported into or exported from the United States (with the exception of trade with Canada and Mexico which moves primarily by rail or truck). In addition, summary reports and tabulations containing data exclusively on waterborne or airborne trade are also prepared. (For further information regarding specific reports and tabulations, see chapters III and IV.)

In using the statistics on trade by vessel, air, and all methods of transportation, it should be noted that there are some differences in the coverage of these statistics, primarily as follows:

1. The data for "all methods of transportation" include exports and imports by vessel, air, rail, truck, air mail, parcel post, and other methods of transportation. The data for vessel and air exports and imports represent waterborne and airborne shipments only (merchandise actually transported aboard a vessel or an aircraft.)
2. Imports and exports of (a) vessels moving under their own power or afloat and (b) aircraft flown into or out of the United States are included in the "all methods" data but excluded from the vessel and air statistics.
3. Mail and parcel post shipments (including those transported by vessel or air) are included in the "all methods" data but excluded from the vessel and air statistics.
4. Exports of Special Category commodities, which are included in the "all methods" data (see Security Restrictions, above) are included in the overall totals for vessel value and air value and shipping weight, but not in the overall vessel shipping weight total nor in any of the detailed vessel and air statistics.

The shipping weight figures shown for vessel and air shipments represent the gross weight of shipments, including the weight of moisture content, wrappings, crates, boxes, and containers (other than containers used for containerized cargo). Shipping weight information is required to be reported for shipments by vessel and air only.

The vessel and air statistics represent shipments which arrived in or departed from the United States by

these methods of transportation. In some instances shipments from abroad arrive in Canada or Mexico by vessel or air and are then transshipped through those countries to the United States by rail or truck. In the U.S. import statistics, such shipments are not reported as vessel or air shipments but, of course, are included in the "all methods" statistics. Likewise, in the case of exports, if shipments are sent by rail or truck from the United States to Canada or Mexico for exportation by vessel or air to another country of destination, the shipments are not reported as vessel or air shipments but are included in the "all methods" statistics as exports to the country of ultimate destination.

EXPORTS AND IMPORTS ADJUSTED FOR SEASONAL AND WORKING-DAY VARIATION

Since October 1960 the Bureau of the Census has presented seasonally adjusted monthly totals for exports and imports in Summary Reports FT 900-E and 900-I. These reports carry in the January issue a 13-month time series which increases to 24 months for the December issue.

Seasonally adjusted data also appear in three other Bureau of the Census publications:

1. Foreign Commerce and Navigation--The 1963 edition presents in table 2 the historical series from January 1948 through December 1963. The soon to be released 1964 edition will present this data through December 1964.
2. Report FT 990, Highlights of U.S. Export and Import Trade--This report, issued monthly, carries in tables E-1 and I-1 monthly data for the current and preceding four years and annual totals back to 1954.
3. Working-Day and Seasonal Adjustment Factors and Months for Cyclical Dominance (MCD)--The latest seasonal adjustment pamphlet was issued in November of 1966, and a new edition is planned for the middle of this year. In addition to presenting the time series data from January 1953 forward, the pamphlet also has an explanation of the adjustment methodology, the working-day and seasonal adjustment factors used to adjust the series, and estimates of the trend-cycle components of the series.

The adjustment program has the goal of providing current as well as historical time series that approximate the trend and cyclical movements of the data. The three basic operations of this program can be summarized as follows: 1) adjustment for working-day variation, 2) adjustment for seasonal variation and 3) calculation of a moving average of the adjusted data equal to the MCD (Months for Cyclical Dominance).

The working-day adjustment removes the estimated variation in the data caused by changes in the length and composition of the tabulating period (in this case the calendar month). The length of the month which varies from 28 to 31 days is standardized at 30.4375 days. The change in daily composition of the month is adjusted for because a given day of the week can occur either 4 or 5 times in a month and some days of the week have a

larger volume of trade than others. In adjusting for the change in composition of the months, each of the seven days of the week is assigned a relative weight based partly upon computations of the Method II Program and partly upon studies of external evidence. These weights are combined into monthly working-day adjustment factors that are applied to the data.

The seasonal adjustment removes the estimated variation in the data that recurs every year with approximately the same timing and magnitude. The Method II Program, from evidence contained within the monthly series, calculates monthly seasonal adjustment factors that are applied to the data which have been adjusted for working-day variation.

As can be seen from the data in table 1 and the graphs in the FT 900-E and -I Reports, both the import and the export series show somewhat irregular month-to-month fluctuations, even after working-day and seasonal adjustment. These erratic fluctuations are believed to be to some extent inherent in the nature of the trade but they also arise from certain economic events, some political actions, the effects of unusual weather, changes in the method of reporting or processing statistical data, and other irregular developments. In order to bring out long term developments more clearly, these graphs show the data in terms of a MCD moving average of the seasonally adjusted series. The MCD has been estimated by the Method II program to be "4" for both imports and exports. It is taken as the shortest span over which the average percentage change, without regard to sign, in the estimated trend-cycle component is larger than in the irregular component or erratic fluctuations of the time series.

For a more detailed explanation of the seasonal adjustment program see the following references:

TRADE OF OUTLYING AREAS OF THE UNITED STATES

Coverage

The statistics on U.S. trade with Puerto Rico and with outlying areas of the United States cover shipments by all methods of transportation combined. Shipments from the United States to U.S. Armed Forces for their own use are not included in the statistics. Shipments from the United States to other U.S. Government agencies, except office furniture, equipment, and supplies for the use of such agencies, are included.

Statistics on trade between the United States and Puerto Rico and other outlying areas is published in Report FT 800. Additional data regarding this trade are presented in tabulations IM 160, IM 161, VI 581, and EM 594. Any trade which may take place between Puerto Rico and the other areas is included in the statistics as follows: Shipments from Puerto Rico to other

areas, except the Virgin Islands, are included in statistics on shipments to the United States; shipments from Puerto Rico to the Virgin Islands are included in the statistics on shipments from the United States to the Virgin Islands; shipments from the Virgin Islands to Puerto Rico are included as shipments from the Virgin Islands to the United States. Shipments from Guam and American Samoa to the other areas are included in statistics on shipments from Guam and American Samoa to the United States. No report is made by the Bureau of the Census on any shipments which may originate in other outlying areas.

Source of Information

The source of information for shipments from the United States to Puerto Rico and to the other areas, and from Puerto Rico to the United States, is the Shipper's Export Declaration (Department of Commerce form 7525-V) which shippers are required to file with customs officials. The source documents used to compile information on shipments from the Virgin Islands, Guam, and American Samoa to the United States are the import entries which are filed by the importer in advance of, or at the time the merchandise arrives in the United States.

Valuation

The valuation definition used in the statistics on shipments from the United States to Puerto Rico and the other areas, and shipments from Puerto Rico to the United States is the same as the value definition for U.S. exports to foreign countries, i.e., the value at the sea-port, border point, or airport of exportation. It is based on the selling price (or cost if not sold), and includes inland freight, insurance, and other charges to the port of exportation. The value shown in the statistics on shipments from the Virgin Islands, Guam, and American

Samoa to the United States is defined generally as the market value in the place of origin, excluding any U.S. import duties, ocean freight and marine insurance.

Trade with Foreign Countries

The Virgin Islands of the United States are not a part of the U.S. customs area for the collection of duties and their trade is not included in total U.S. export or import statistics. However, export declarations and import entries are filed with customs officials in the Virgin Islands in the same way as for the U.S. customs area, and separate statistics are compiled by the Bureau of the Census from these documents covering the trade of the Virgin Islands with foreign countries. Information on imports from foreign countries into the Virgin Islands for consumption is presented in machine tabulations IM 141-V and IM 142-V. Data on exports from the Virgin Islands to foreign countries are presented in machine tabulation EM 591.

Puerto Rico is a customs district within the U.S. customs area, and its trade with foreign countries is included in the export and import statistics showing the trade of the United States with foreign countries. The statistics on trade of Puerto Rico with foreign countries represent exports and imports through the Puerto Rico Customs District and do not necessarily represent exports of commodities originating in Puerto Rico nor imports of commodities for direct consumption in Puerto Rico. Statistics showing commodity detail for such trade are presented in machine tabulations IM 154 and EM 563. Data on imports and exports through the Puerto Rico Customs District are included in tables containing customs district information.

Data on trade of other outlying areas with foreign countries are not included in reports or tabulations currently released by the Census Bureau.

Chapter III - Published Foreign Trade Reports

The published reports containing foreign trade data fall into two general categories, (a) those containing summary statistics and (b) those containing more detailed data.

Summary Reports

Reports containing summary statistics are released monthly unless otherwise indicated. In some instances monthly reports include both current monthly and cumulative data for the current year, with annual totals appearing in the December issue. For those monthly reports which do not include cumulative data, a separate annual issue is published. A list of the summary reports by number and title is given below. Illustrations of the data included in the reports are presented on the pages indicated. These exhibits indicate the general format and type of information to be found in the reports. Summary reports may be obtained from the Bureau of the Census by subscription.

FT 810	Bunker Oil and Coal Laden in the United States on Vessels Engaged in Foreign Trade (See page 12.)
FT 900-I	Total Import Trade (See page 13.)
FT 900-E	Total Export Trade (See page 14.)
FT 975	Vessel Entrances and Clearances. Published annually only. (See page 15.)
FT 985	U.S. Waterborne Foreign Trade, Trade Area, Coastal District, Customs District, Port of Lading or Unlading, and Type of Service (See pages 16-21.)
FT 986	U.S. Airborne Foreign Trade, Customs District by Continent (See page 22.)
FT 990	Highlights of U.S. Export and Import Trade (See pages 23-39.)
FT 2402	U.S. Gold and Silver Movements (See page 40.)

Detailed Reports

Published reports containing more detailed statistics than those presented in the summary reports are listed below by report number and title of report. These reports contain current monthly and cumulative data with annual totals appearing in the December issue, except as noted. Illustrations of tables contained in the reports are shown on the pages indicated for each report.

FT 130	U.S. General Imports of Cotton Manufactures, Country of Origin by Geneva Agreement Category. Current month and cumulative from preceding October to date. (See page 41.)
FT 135	U.S. Imports, General and Consumption, Schedule A Commodity and Country (See page 42.)
FT 410	U.S. Exports, Schedule B Commodity and Country (See pages 43 and 44.)
FT 800	U.S. Trade With Puerto Rico and United States Possessions. Monthly issues contain current monthly data only. Annual data published separately. (See pages 45 and 46.)

Annual Reports

FT 150	U.S. General Imports, Schedule A Commodity Groupings, World Area, Country, and Method of Transportation (See pages 47 and 48.)
FT 155	U.S. General Imports, World Area, Country, Schedule A Commodity Groupings, and Method of Transportation (See pages 49 and 50.)
FT 210	U.S. Imports for Consumption and General Imports, SIC-Based Products and Area (See page 51.)
FT 246	U.S. Imports for Consumption and General Imports, TSUSA Commodity and Country (See page 52.)
FT 450	U.S. Exports, Schedule B Commodity Groupings, World Area, Country, and Method of Transportation (See pages 53-55.)
FT 455	U.S. Exports, World Area, Country, Schedule B Commodity Groupings, and Method of Transportation (See pages 56-58.)
FT 610	U.S. Exports of Domestic Merchandise, SIC-Based Products and Area (See page 59.)

Table E-8. Domestic and Foreign Merchandise—U.S. Customs Regions, World Areas, and Method of Transportation: 1967

(For coverage, security restrictions, and related matters, see Explanation. All vessel and air totals in this table exclude exports of vessels under their own power or afloat, mail shipments, and Special Category commodities. Exports of these commodities by all methods of transportation are included in the grand total and in the world area totals at the top of the table but are excluded from the customs region by world area totals. Shipments valued under \$100 are included in the grand total and world area totals but are excluded from the customs region by world area totals. Summary totals on exports of these commodities appear at the end of the table. X-Not applicable. Z-Less than one-half of rounded unit)

U.S. GOLD AND SILVER MOVEMENTS: AUGUST 1967

The monetary gold stock of the United States was decreased during August by \$99,701,000 to \$13,008,085,000 at the end of the month as the combined result of earmarking operations, receipts from foreign countries, exports, domestic production and other factors.

Gold held under earmark at the Federal Reserve Banks increased during August by \$17,489,707 to \$12,993,152,068 (Source of information on United States monetary gold stocks and earmarking operations: Board of Governors of Federal Reserve System.)

Chapter IV - Unpublished Foreign Trade Reference Material

As a part of its regular statistical program, the Census Bureau prepares tabulations and reports for public reference use which contain data in various arrangements and in greater detail than the statistics presented in published reports. The tabulations and reports, in general, contain both net quantity and value information. In those instances where method of transportation information is included, value data (and frequently net quantity data also) are presented for all methods of transportation combined, with separate shipping weight and value information shown for vessel and air shipments. In the import tabulations, method of transportation information is presented for general imports, but not for imports for consumption. If a monthly tabulation contains cumulative as well as current monthly data, annual information is presented in the December issue. (See the sections on import and export annual tabulations for additional sources of annual data.)

Lists of the tabulations and reports, showing identification number and a brief description of the general content of each, appear below. The exhibits on the following pages show the type of information and the general format of these tabulations. In those cases where both a monthly and an annual tabulation are prepared in the same arrangement, a single exhibit is presented, representing both the monthly and the annual tabulation.

IMPORT TABULATIONS

Monthly Tabulations

- IM 136 Imports for consumption and general imports--country of origin by TSUSA commodity by unit control by customs district and method of transportation (general imports only), all methods of transportation combined for imports for consumption. Current month.
- IM 141-V Imports for consumption into the Virgin Islands from foreign countries--TSUSA commodity by unit control by country of origin by customs district by type. All methods of transportation combined. Current month.
- IM 142-V Imports for consumption into the Virgin Islands from foreign countries--country of origin by TSUSA commodity by unit control. All methods of transportation combined. Current month.
- IM 145 Imports for consumption and general imports--TSUSA commodity by unit control by country of origin by customs district (district of entry for all methods of transportation, district of unloading for vessel and air) by rate provision by type by economic class and method of transportation (general imports only), all methods of transportation combined for imports for consumption. Current month.

- IM 145 UC-2 Imports for consumption and general imports--TSUSA commodity (unit control 2 only) by country of origin by rate provision by customs district by type, by economic class. All methods of transportation combined. Current month.
- IM 145 A Imports for consumption and general imports--Schedules 1 through 7 TSUSA commodity numbers for items reported under TSUSA numbers 807.0020 and 807.0040 by country of origin. (Articles assembled abroad in whole or in part from U.S. components.) All methods of transportation combined. Current month.
- IM 146 Imports for consumption--TSUSA commodity by unit control by country of origin. Shows quantity and value, dutiable value, calculated duty, and average ad valorem rate of duty. All methods of transportation combined. Current month and cumulative year-to-date.
- IM 150/155 General imports--Schedule A commodity groupings, world area, country of origin and method of transportation. Current month and cumulative year-to-date.
- IM 154 Imports for consumption and general imports--customs district (district of entry for all methods of transportation, district of unloading for vessel and air) by country of origin by TSUSA commodity by unit control and method of transportation (general imports only), all methods of transportation combined for imports for consumption. Current month.
- IM 160 General imports into the United States from Midway Island, Wake Island, Guam, Canton and Enderbury Islands, and American Samoa. Country of origin by TSUSA commodity by unit control by customs district by type. All methods of transportation combined. Current month.
- IM 161 General imports into the United States from the Virgin Islands--TSUSA commodity by unit control by customs district by type. All methods of transportation combined. Current month.
- IM 171 General imports--"end-use" commodity categories by country or area arrangement and vice-versa. All methods of transportation combined. Current month, cumulative year-to-date, and individual quarters of the year (11 parts).

SM 305 Waterborne general imports--type of vessel service by customs district and port of unloading by foreign port of lading by Schedule A subgroup by country of origin. Current month.

SM 305-IT Waterborne inbound in-transit shipments. Same arrangement as SM 305, above.

SM 311 Waterborne general imports--type of vessel service by trade area by coastal district of unloading by country of lading by district of unloading. Current month.

SM 311-IT Waterborne inbound in-transit shipments. Same arrangement as SM 311, above.

AE 350 Listing of vessel entrances, released in two sections:

No. 1 - By name of vessel, in alphabetic order. Current month.

No. 2 - By name of vessel, in customs district, port, and manifest number arrangement. Current month.

Annual Tabulations (For additional sources of annual data, see the preceding list for those monthly tabulations which contain cumulative information).

IA 236 Imports for consumption and general imports--released in two sections:
(1) country of origin by TSUSA commodity by unit control by customs district and method of transportation (general imports only), all methods of transportation combined for imports for consumption;
(2) country of origin by TSUSA commodity by unit control by customs district, all methods of transportation combined for consumption and general imports, showing calculated duty and dutiable value for imports for consumption.

IA 245 Imports for consumption and general imports--released in two sections:
(1) TSUSA commodity by unit control by country of origin by customs district (district of entry for all methods of transportation, district of unloading for vessel and air) by rate provision by type by economic class and method of transportation (general imports only), all methods of transportation combined for imports for consumption;
(2) TSUSA commodity by unit control by country of origin by customs district by rate provision by type, all methods of transportation combined for consumption and general imports, showing calculated duty and dutiable value for imports for consumption. Released semiannually and annually.

IA 245 UC-2 Imports for consumption and general imports--TSUSA commodity (unit control 2 only) by country of origin by rate provision by customs district by type by economic class. All methods of transportation combined.

IA 245 A Imports for consumption and general imports--Schedules 1 through 7 TSUSA commodity numbers for items reported under TSUSA numbers 807.0020 and 807.0040 by country of origin. (Articles assembled abroad in whole or in part from U.S. components.) All methods of transportation combined.

IQ 247 Imports for consumption and general imports--Schedule A commodity by country of origin. All methods of transportation combined. Cumulative year-to-date. Released quarterly.

IA 253 Imports for consumption and general imports--customs district by TSUSA commodity by unit control by country of origin. All methods of transportation combined showing calculated duty and dutiable value for imports for consumption.

IA 254 Imports for consumption and general imports--released in two sections:
(1) customs district by country of origin by TSUSA commodity by unit control and method of transportation (general imports only), all methods of transportation combined for imports for consumption;

(2) customs district by country of origin by TSUSA commodity by unit control, all methods of transportation combined for consumption and general imports, showing calculated duty and dutiable value for imports for consumption.

IA 276 Imports for consumption and general imports--8-digit SIC-based commodity by country. All methods of transportation combined.

SA 305 Waterborne general imports--type of vessel service by customs district and port of unloading by foreign port of lading by Schedule A subgroup by country of origin.

SA 305-IT Waterborne inbound in-transit shipments. Same arrangement as SA 305, above.

SA 311 Waterborne general imports--type of vessel service by trade area by coastal district of unloading by country of lading by district of unloading.

SA 311-IT Waterborne inbound in-transit shipments. Same arrangement as SA 311, above.

EXPORT TABULATIONS

Monthly Tabulations (Domestic and foreign merchandise shown separately)

EM 450/455 Exports of domestic and foreign merchandise--Schedule B commodity groupings, world area, country, and method of transportation. Current month and cumulative year-to-date.

EM 522 Exports of domestic and foreign merchandise--Schedule B commodity by country of destination by customs district of exportation and method of transportation. Current month.

Em 522 (Double-unit Supplement) Exports of domestic and foreign merchandise--Schedule B double-unit commodities only (unmanufactured cotton and selected manufactured products of cotton and other fibers) by country of destination by customs district of exportation. All methods of transportation combined. Current month.

EM 531 Exports of domestic and foreign merchandise--country of destination by Schedule B commodity by customs district of exportation and method of transportation. Current month.

EM 537 Exports of domestic and foreign merchandise--Schedule B commodity totals. All methods of transportation combined. Current month.

EM 563 Exports of domestic and foreign merchandise--customs district of exportation by country of destination by Schedule B commodity and method of transportation. Current month.

EM 571 Exports of domestic and foreign merchandise--"end-use" commodity categories by country or area arrangement and vice-versa. All methods of transportation combined. Current month, cumulative year-to-date, and individual quarters of the year. (11 parts).

VI 581 Shipments of merchandise from the United States to the Virgin Islands through the Customs District of Puerto Rico. In 7-digit Schedule B commodity arrangement. All methods of transportation combined. Current month.

EM 591 Exports of domestic and foreign merchandise from the Virgin Islands to foreign countries--Schedule B commodity by country. All methods of transportation combined. Current month.

EM 594 Shipments of merchandise from the United States to Puerto Rico--country of destination (Puerto Rico) by 7-digit Schedule B commodity. All methods of transportation combined. Current month.

EM 595 Shipments of merchandise from the United States to Puerto Rico and U.S. possessions--country of destination by Schedule B commodity. All methods of transportation combined. Current month.

SM 705 Waterborne exports of domestic and foreign merchandise--type of vessel service by customs district and port of lading by foreign port of unloading by Schedule B commodity (4-digit) by country of destination. Current month.

SM 705-IT Waterborne outbound in-transit shipments. Same arrangement as SM 705, above, plus country of origin.

SM 705 Supplement Waterborne Department of Defense controlled cargo under U.S. foreign aid programs and Special Category non-Department of Defense controlled cargo--type of vessel service by customs district and port of lading by country/area of unloading. Current month.

SM 711 Waterborne exports of domestic and foreign merchandise--type of vessel service by trade area of unloading by coastal district of lading by country of unloading by district of lading. Current month.

SM 711-IT Waterborne outbound in-transit shipments. Same arrangement as SM 711, above.

AE 750 Listing of vessel clearances, released in two sections:

No. 1 - By name of vessel, in alphabetic order. Current month.

No. 2 - By name of vessel, in customs district, port, and manifest number arrangement. Current month.

Annual Tabulations

EA 622 Exports of domestic and foreign merchandise--Schedule B commodity by country of destination by customs district of exportation and method of transportation.

EA 622 (Double-unit Supplement) Exports of domestic and foreign merchandise--Schedule B double-unit commodities only (unmanufactured cotton and selected manufactured products of cotton and other fibers) by country of destination by customs district of exportation. All methods of transportation combined. Released semiannually and annually.

EQ 629 Exports of domestic and foreign merchandise--Schedule B commodity by country of destination. All methods of transportation combined. Cumulative data released quarterly.

EA 631 Exports of domestic and foreign merchandise--country of destination by Schedule B commodity by customs district of exportation and method of transportation.

EA 637 Exports of domestic and foreign merchandise--Schedule B commodity by month arrangement with cumulative year-to-date totals. All methods of transportation combined. Released semi-annually and annually.

EA 663 Exports of domestic and foreign merchandise--customs district of exportation by country of destination by Schedule B commodity and method of transportation.

EA 664 Exports of domestic and foreign merchandise--customs district of exportation by Schedule B commodity by country of destination and method of transportation.

EA 676 Exports of domestic and foreign merchandise--8-digit SIC-based commodity by country. All methods of transportation combined.

EA 695 Shipments of merchandise from the United States to Puerto Rico and U.S. possessions--country of destination by Schedule B commodity. All methods of transportation combined.

SA 705 Waterborne exports of domestic and foreign merchandise--type of vessel service by customs district and port of lading by foreign port of unlading by Schedule B commodity (4-digit) by country of destination.

SA 705-IT Waterborne outbound in-transit shipments. Same arrangement as SA 705, above, plus country of origin.

SA 705 Supplement Waterborne Department of Defense controlled cargo under U.S. foreign aid programs and Special Category non-Department of Defense controlled cargo--type of vessel service by customs district and port of lading by country/area of unlading.

SA 711 Waterborne exports of domestic and foreign merchandise--type of vessel service by trade area of unlading by coastal district of lading by country of unlading by district of lading.

SA 711-IT Waterborne outbound in-transit shipments. Same arrangement as SA711, above.

Copies of the tabulations included in the preceding lists are available for public reference use at the principal reference locations listed below and at various other Department of Commerce Field offices. (See complete list of field offices at the end of this brochure.) Since the distribution of tabulations varies among field offices, inquiry should be made regarding the availability of particular tabulations at individual field offices.

The principal reference locations for foreign trade statistics are:

New York Office
Foreign Trade Branch
Processing Division
Bureau of the Census
Room 434 Customhouse
New York, New York 10004
(Located at Bowling Green)

Trade Information Branch
Foreign Trade Division

AE 350 - Part 1
MONTHLY VESSEL ENTRANCES IN ALPHABETIC VESSEL NAME ARRANGEMENT

EXPLANATION OF CODES:

Type Service

1. Liner or berth
4. Tanker
5. Irregular or Tramp

Rig

1. Motor dry cargo, steam dry cargo
2. Motor tanker, steam tanker
3. Tug
4. Barge (other than tanker), scow
5. Tanker Barge
6. Other, including yacht, gas, sloop, schooner, sailboat, houseboat, rowboat, research vessel

Ballast or Cargo

1. Vessel entered direct from foreign in ballast
2. Vessel entered direct from foreign with bulk cargo
3. Vessel entered direct from foreign with general cargo
4. Vessel entered via other domestic ports in ballast
5. Vessel entered via other domestic ports with bulk cargo
6. Vessel entered via other domestic ports with general cargo

Country and Subdivision or U.S. Port

Indicates first foreign country entering direct from (origin of inbound voyage) in terms of Schedule C code. Where "country from" has marked coastal differences a further distinguishing sub-country code is added—otherwise sub-country code is always "0". If entering via domestic ports, indicates last U.S. port vessel cleared in terms of Schedule D code.

Type Vessel

0. Vessels from other domestic ports, Navy operated vessels, vessels in for repairs or crew changes, and all other types excluded by reason of FT 975 coverage.
1. All vessels except tanker entered direct from foreign
2. Tankers entered direct from foreign

Type Cargo

0. All vessels coded "0" under type vessel
1. Bulk or general cargo
3. Ballast

Trip Code

0. No foreign cargo discharged at this port
1. Foreign cargo discharged at this port
9. Vessels under 26 net registered tons

AE 350 - Part 2
MONTHLY VESSEL ENTRANCES IN DISTRICT, PORT, AND MANIFEST ARRANGEMENT

EXPLANATION OF CODES:

Type Service

1. Liner or berth
4. Tanker
5. Irregular or Tramp

Rig

1. Motor dry cargo, steam dry cargo
2. Motor tanker, steam tanker
3. Tug
4. Barge (other than tanker), scow
5. Tanker Barge
6. Other, including yacht, gas, sloop, schooner, sailboat, houseboat, rowboat, research vessel

Ballast or Cargo

1. Vessel entered direct from foreign in ballast
2. Vessel entered direct from foreign with bulk cargo
3. Vessel entered direct from foreign with general cargo
4. Vessel entered via other domestic ports in ballast
5. Vessel entered via other domestic ports with bulk cargo
6. Vessel entered via other domestic ports with general cargo

Country and Subdivision or U.S. Port

Indicates first foreign country entering direct from (origin of inbound voyage) in terms of Schedule C code. Where "country from" has marked coastal differences a further distinguishing sub-country code is added—otherwise sub-country code is always "0". If entering via domestic ports, indicates last U.S. port vessel cleared in terms of Schedule D code.

Type Vessel

0. Vessels from other domestic ports, Navy operated, vessels, vessels in for repairs or crew changes, and all other types excluded by reason of FT 975 coverage.
1. All vessels except tanker entered direct from foreign
2. Tankers entered direct from foreign

Type Cargo

0. All vessels coded "0" under type vessel
1. Bulk or general cargo
3. Ballast

Trip Code

0. No foreign cargo discharged at this port
1. Foreign cargo discharged at this port
9. Vessels under 26 net registered tons

MONTHLY VESSEL CLEARANCES IN ALPHABETIC VESSEL NAME ARRANGEMENT

EXPLANATION OF CODES:

Type Service

1. Liner or berth
4. Tanker
5. Irregular or Tramp

Rig

1. Motor dry cargo, steam dry cargo
2. Motor tanker, steam tanker
3. Tug
4. Barge (other than tanker), scow
5. Tanker Barge
6. Other, including yacht, gas, sloop, schooner, sailboat, houseboat, rowboat, research vessel

Ballast or Cargo

1. Vessel cleared direct to foreign in ballast
2. Vessel cleared direct to foreign with bulk cargo
3. Vessel cleared direct to foreign with general cargo
4. Vessel cleared via other domestic ports with bulk cargo
5. Vessel cleared via other domestic ports with bulk cargo
6. Vessel cleared via other domestic ports with general cargo

Country and Subdivision or U.S. Port

Indicates first foreign country clearing direct to (Schedule C code). Where "country to" has marked coastal differences a further distinguishing sub-country code is added-otherwise sub-country code is always "0". If clearing via domestic ports, indicates first U.S. port vessel entered in terms of Schedule D code.

Type Vessel

0. Vessels to other domestic ports, Navy operated vessels, vessels in for repairs or crew changes, and all other types excluded by reason of FT 975 coverage
1. All vessels except tanker cleared direct to foreign
2. Tankers cleared direct to foreign

Type Cargo

0. All vessels coded "0" under type vessel
1. Bulk or general cargo
3. Ballast

Trip Code

0. No U.S. export or in-transit export cargo was laden at this port
1. U.S. export or in-transit export cargo was laden at this port
9. Vessels under 26 net registered tons

Chapter V - Origin of Exports and Destination of Imports

The Census Bureau frequently receives inquiries regarding the possibility of obtaining information showing the place of origin for domestic merchandise exported from the United States and the place within the United States to which imported merchandise is destined. This type of information is not compiled as a part of the foreign trade statistics program since it is not required to be reported on import entries or export declarations, the basic sources from which the foreign trade data are compiled.

In recognition of the need for information on the origin of exported merchandise, the Census Bureau has conducted some special surveys to obtain such data. The results of the most recent survey were released in a report entitled Survey of the Origin of Exports of Manufactured Products: 1966, 1963, and 1960, Series M 161(66)-1. This report includes distributions of manufacturers' exports by regions, States, and metropolitan areas, and by Standard Industrial Classifications. This information was reported by manufacturers to the Census Bureau for products that the manufacturers knew were to be exported by the plant directly or through others with no additional manufacturing. Copies of this report may be obtained from the Bureau of the Census.

Some of the requests which have been received for information on the origin of exports have contained the suggestion that exporters be required to report such information on export declarations and that this information be compiled as a part of the regular foreign trade statistics program. After extensive consideration, the conclusion has been reached that the institution of a requirement for reporting such information on the export declaration does not provide a practical solution to the problem. The added reporting burden on exporters would be great. Also, the exporter or the person preparing the export declaration (frequently an agent acting on behalf of the exporter) may not have information about the place of origin of the merchandise. In addition, the added processing costs for tabulating place of origin information from the export declarations could be expected to be disproportionately high because of the large number of individual observations to be sorted and summarized.

Investigations into the possibility of compiling place of origin information from export declarations have indicated that this type of data would be extremely difficult to obtain in some instances. Many commodities exported from the United States actually originate in many different parts of the country. Automobiles, for instance, may be assembled in Michigan but the parts which go to make up the automobile may have been manufactured or "originated" in almost every area of the United States. In the case of automobiles, therefore, the most that could be attempted without an impractical amount of detail would be to show where the automobiles were assembled into the form in which they are ready for export. This would also be true for many other commodities.

In some cases further difficulties would exist with regard to determining the place at which the commodities were assembled into final form ready for export. An electric generator for installation on an automobile might be manufactured in Indiana and then shipped to Michigan for storage and for future sale as a replacement part. The generator eventually might be shipped from Michigan to Louisiana for export. While the generator could be defined as actually assembled ready for export in Indiana, the practical difficulties of determining this fact might be such that it would be necessary to credit Michigan as the place at which the generator was finally assembled ready for export. Similarly, pharmaceuticals may be made in many parts of the United States but packaged as shipments of mixed pharmaceuticals for export in New York. Because of the difficulties of obtaining information on where each part of a mixed shipment of pharmaceuticals was created or assembled in final form ready for export, it probably would be necessary to credit the whole shipment to the place of final packaging, in this case New York.

The examples given above provide some indication of the extent of the problems which would be involved in attempting to obtain information regarding origin of exports from the export declarations and at the present time there are no plans for trying to obtain such information from this source.

Chapter VI - List of Classification Schedules

To facilitate the compilation of the foreign trade statistics, various classification schedules are used for translating data such as commodity, country, district, etc. into numeric codes. The schedules contain lists of the names or descriptions of the items with their assigned numeric codes. Following is a list of the classification schedules used in compiling and publishing the foreign trade statistics:

Schedule A - Statistical Classification of Commodities Imported Into the United States

Schedule B - Statistical Classification of Domestic and Foreign Commodities Exported From the United States

Schedule C - Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics

Schedule D - Code Classification of United States Customs Districts and Ports Used in Compiling the United States Foreign Trade Statistics

Schedule K - Code Classification of Foreign Ports by Geographic Trade Area and Country

Schedule P - Commodity Classification for Reporting Shipments From Puerto Rico to the United States

Schedule R - Code Classification and Definitions of Foreign Trade Areas

Tariff Schedules of the United States Annotated

Copies of Schedule B and TSUSA may be obtained from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. For information regarding other schedules, contact the Bureau of the Census.

Chapter VII - Availability of Special Services

In addition to the sources of data described herein, the Census Bureau provides a special service whereby users of the statistics may obtain information at an earlier date than the release of published reports or may obtain data in greater detail or in different arrangement than that available in the statistics which are regularly released. The entire cost of the special work required to compile or duplicate the information from the basic data is charged to the subscriber. Special reports contracted for on a cost-to-subscriber basis are listed in current publications so that all users of foreign trade statistics may be informed of the type of reports being prepared and the cost involved. Additional subscribers may purchase any special reports listed in the publication.

The preparation of these reports on a cost basis is carried out in accordance with the Bureau of the Census "Policy Governing Special Work and Services" set forth in current issues of the Bureau of the Census catalog. This reads in part as follows:

"The Congress appropriates funds to the Bureau to carry out certain projects. Since funds are limited, the Bureau cannot prepare or publish all the useful tabulations of the information collected. Administrative decisions must be made with regard to what information will serve the largest number of needs and how much of the information of general interest can be made available within the limits of available funds. The use of the filled-in questionnaires and schedules is restricted by law to employees of the Bureau of the Census. The use of specific punchcards or magnetic tapes is restricted in accordance with the information shown thereon.

"The work sheets and tabulation sheets, which show more detail than is found in published reports, can be made available through some method of duplication such as photocopying or transcription. Basic source materials, such as schedules or punched cards, contain data that can be tabulated and used to furnish additional needed information. Arrangements can be made in some instances to furnish information in advance of publication. Such arrangements entail additional cost, which has to be recovered.

"There are available in the Bureau a variety of skills, equipment, and records which are maintained for meeting the regular commitments of the Bureau. These facilities can serve the needs of other Government agencies and other groups. The skills, equipment, and other resources can be made available for statistical operations such as survey design, mailing, field collection, machine tabulation, population estimates and forecasts, and similar tasks. Members of the staff are available on occasion for consultation.

"Services as indicated above are furnished at cost by the Bureau under the conditions described below. Cost is interpreted to mean the actual cost to the Bureau of the Census, including the cost of planning the special work and appropriate overhead charges.

A. Special transcriptions and tabulations of census data.—Special transcriptions and tabulations of data in the files of the Bureau of the Census will be undertaken on a cost basis as requested, provided there is no serious interruption of the regular work program of the Bureau. Those requesting special tabulations should understand that the data are based on surveys paid for by public funds and are, therefore, public property. The purposes for which such tabulations are obtained must not be contrary to the public interest nor must they be used to give unfair commercial or other advantage to any person or group.

"All unpublished data furnished by the Bureau will be accompanied, so far as feasible, by appropriate statements relative to the limitations of the data. When the condition of the data warrants it, the Bureau may specify that the material is for the information of the purchaser only and may not be published, or that any proposed publication of such material must be cleared with the Bureau before publication.

"Special tabulations paid for by nongovernmental groups will be undertaken with the understanding that:

1. The material may be published subsequently by the Bureau and made generally available either without charge or at cost of publication, if the Bureau regards the material to be of general interest. If such action is taken within the time period provided in the agreement, or within 6 months if no time period is provided in the agreement, the Bureau will notify all purchasers of such determination and the reasons therefor.
2. If not published, it may be made available to other Government agencies or to appropriate nonprofit research groups without charge or at cost of duplication.
3. A second request by other than a Government agency for the same information will generally be handled in the following manner, if the information has not already been published by the Bureau:
 - a. If a job has not been completed, the costs will be appropriately divided and results will be furnished to both parties.
 - b. When, within the time period provided in the original agreement, information furnished to commercial groups or private individuals is requested by other commercial groups or individuals, the subsequent party (or parties) will be charged not less than the amount paid by the first party obtaining the information. Specified time periods will generally not exceed 18 months. If no time period is provided in the agreement, this provision will apply for 6 months. If the cost to the Bureau for furnishing the information to the subsequent party is significantly less than that charged for the original information and the information is furnished within the agreed-upon time period referred to

above, the total cost will be prorated among the various parties in an equitable manner as determined by the Bureau and refunds made as necessary, provided that the amount for refund exceeds 10 percent of the cost of the original job, or \$25, whichever is larger. After the specified period, subsequent requests will be charged only the additional cost to the Bureau, if any, and no refunds to prior purchasers will be considered. If, for any reason, the Bureau feels that the purchaser of a special tabulation is making unfair or improper use of the information furnished, it may take such action as is deemed appropriate to protect the public interest.

"In order to keep the public informed of special tabulations that have been furnished, the Bureau will list them, except for small projects, in the Bureau of the Census Catalog."

Certain specific points in regard to the application of these policies to the various types of foreign trade reports are described below:

Type A. Advance reports containing final monthly figures not yet available in duplicated report form. Advance reports present postings from machine tabulation sheets at the time the sheets are made publicly available. These sheets are made available several weeks prior to the date on which reports containing the information are distributed in duplicated form. Since the information in advance reports is already publicly available at the time the advance reports are released, the data have to all intents and purposes been published by the Bureau of the Census and the Census "Policy Governing Special Work and Services" is therefore largely inapplicable. Anyone wishing the same type of report can obtain it only on paying the full price of the report, the price in all cases representing the actual clerical cost of posting information from the unduplicated machine tabulation sheets already made available for public reference.

Type B. Reports presenting recombinations of information already published or already made available for public reference in the form of machine tabulation sheets.

These reports may be very simple and may for example merely represent recombinations of information from machine sheets available for public reference. For example, a report of this type may present information on how much of a particular commodity was exported from the United States through a particular Customs district. This information is available for public reference in different form in copies of machine tabulation sheets showing exports in a commodity by country of destination by Customs district arrangement. The report in this example would essentially consist of combining the figures of the movement to each country through the particular Customs district into a total of the amounts shipped to all countries through that Customs district.

Some Type B reports are considerably more complicated rearrangements of information already publicly available. For example, SM 705, which is regularly made available for public reference, presents information of exports by vessel from the United States in United States port by foreign port by commodity by country arrangement. The subscriber to a report to be prepared on a cost basis may wish all of this information rearranged into commodity by United States port arrangement with no segregation by foreign port of unloading. Some such reports can be prepared by manually rearranging the information in the SM 705 in the form requested. In other cases it is substantially more efficient to retabulate the Bureau of the Census source material which was used to prepare the SM 705 into the form requested. The person requesting and paying for such a report pays for the cost of compiling the information either manually or by electronic equipment, whichever is more efficient.

The subscriber to Type B reports appears to be entitled to some assurance that other private organizations and individuals will not under ordinary circumstances obtain access to the information at the same time at no cost or at a substantially reduced cost. Type B reports will therefore ordinarily not be made available to the public without charge or at a substantially reduced cost until 6 months after the reports have been transmitted to the person or organization paying for them. However, the Bureau of the Census reserves the right to publish the data at an earlier date under circumstances such as those described in the extract from the Bureau's "Policy Governing Special Work and Services" quoted above. In such cases the subscriber will be notified that public release is being made prior to the expiration of the 6-month interval. The subscriber will not specifically be notified of any release at the end of the 6-month interval. Public release by the Bureau prior to the expiration of the 6-month interval will not normally occur where the subscriber obtained, and is using, the information for purposes of market research or to determine his own competitive position in the market for a particular product or service.

Where the Bureau receives requests from private organizations or individuals for the information in Type B reports before the expiration of the 6-month or other interval described above, a policy will be followed of requesting the inquirer to pay the same amount as the person who originally subscribed to the report.

If the cost to the Bureau for furnishing the information to the subsequent party (parties) is significantly less than that charged for the original information the total cost will be prorated among the various parties in an equitable manner as determined by the Bureau and refunds made as necessary, provided that the amount for refund exceeds 10 percent of the cost of the original job, or \$25, whichever is larger.

Although information in such reports is being made available on request to Government agencies for their own use during the period the report is not to be released, such agencies are not permitted to release the information publicly without permission having been first obtained from the Bureau. Such permission is granted only under circumstances falling within the Bureau policy quoted above.

Type C. Reports which present information not publicly available in any form. Included in this are reports showing separate statistics on exports or imports of individual products included, without segregation, in a Schedule B or a TSUSA commodity classification regularly shown in the published statistics, and other reports containing information on exports and imports not available in published reports or in unduplicated copies of machine tabulation sheets made available for public reference. Information in Type C reports can, therefore, only be obtained from information on punch cards, electronic computer tape, Shipper's Export Declarations, or import entry forms not publicly available.

In general, the policy followed in making Type C reports publicly available is similar to the policy followed for Type B as described above. Since in contrast to Type B, Type C reports represent newly-compiled information not otherwise publicly available, there is a greater likelihood that the Bureau may find it necessary to release the information in Type C reports at a date earlier than 6 months after transmittal to the subscriber.

Preliminary Investigations

In addition to the actual work involved in preparing Type B and Type C reports, there are, in some cases, considerable amounts of work required in preliminary investigations of basic records even before estimates of the cost of preparing the reports can be made. These preliminary investigations of basic records, depending on the information to be obtained for the report, include such determinations as the following:

1. Determination of whether the desired information is available.
2. Determination of whether the release of desired information would tend to reveal the transactions of individual firms, in which case the information would not be released.
3. The determination of the best procedure under which the information would be obtained. This determination would include the comparison of costs under alternate procedures and the selection of the procedure with the lowest cost.

Preliminary investigations along the lines outlined above are not required for all reports. However, if a preliminary investigation is required before the cost of some reports can be estimated, persons requesting such reports will be charged the cost of the investigation. Wherever it is necessary to make a charge for preliminary investigation, the charge will usually be \$125.

Request for additional information in regard to the preparation and release of foreign trade special reports prepared on a cost basis should be addressed to the Foreign Trade Division, Bureau of the Census, Washington, D.C. 20233.
